PROFESSIONAL SUMMARY

Full-stack software engineer and startup founder passionate about building scalable web applications that solve real-world problems. Experienced in taking products from idea to production, with a strong focus on creating reliable, user-friendly software and collaborating effectively in team environments.

EXPERIENCE

Founder & Full-Stack Software Engineer | Tixkarios Global Services 2026 – Present

- Founded and built Tixkarios, a production event ticketing and event management platform.
- Designed the application architecture, APIs, database, and admin dashboard.
- Implemented online payments, QR code ticket verification, analytics, authentication, and event management.
- Processed millions in ticket transactions while maintaining a secure and reliable platform.
- Continuously optimized performance, security, and user experience.

Software Engineering Intern & Team Lead | 3jstech 2025 – 2026

- Developed and maintained client web applications.
- Led team collaboration and resolved technical challenges.
- Collaborated with designers and stakeholders to deliver scalable software.
- Contributed to production deployments and application performance improvements.

PROJECTS

Exambrite

Online examination platform for creating and managing assessments, featuring secure authentication, automated grading, and results management. Reached over 500 registered users within the first three months after launch.

University Practicum Portal *(Client Project)*

Designed and developed a practicum management portal for a university, enabling student placement, supervisor management, progress tracking, and administrative reporting.
